Highland Area Venturing/Scouting Crew Learns About Horsemanship at Schuetz Farms

Members of Venturing Troop 0000 and Boy Scout Troop 1043 have visited Schuetz Farms for 6 weeks as part of their intensive Horsemanship, Animal Science, Veterinary Medicine, and Farm Mechanics merit badge training. These scouts assisted Scott Schuetz with daily care of the horses on the farm, they even got to halter break one of the 2006 foals at the farm. They also learned how to vaccinate, and worm the horses as well as how to ride. These scouts also learned how to prepare a horse for a show including how to properly vacuum the and band horses. Schuetz Farms is committed to educating the youth in the Highland/ St Rose area about horses and believes that ever child should be able to experience the unconditional love and joy horses bring to the lives of those who take care of them.
